

## FOR IMMEDIATE RELEASE

### **AT&S Pte. Ltd., Appointed Exclusive Distributor of SLiquid/ Sugon's Data-Centre Cooling & Infrastructure Solutions.**

**Singapore, November 27, 2025** — AT&S Pte. Ltd., a subsidiary of AME International Pte. Ltd. is pleased to announce that it has been appointed the **exclusive distributor for SLiquid Global DataCenter Pte. Ltd.** in Asia-Pacific, excluding China. This landmark partnership strengthens AME Group's commitment to delivering advanced, future-ready infrastructure solutions to its clients.

SLiquid, Singapore-based with its parent company, Sugon Data Infrastructure Innovation Technology (Beijing) Co., Ltd is an innovator in data-center cooling and infrastructure, offering a comprehensive portfolio that includes server racks, precision power distribution units (PDUs), Closed Aisle Systems, CRAC units, cold-plate and immersion liquid-cooling systems, and turnkey containerised and modular data-centre solutions.

Under the agreement, AT&S will handle regional sales, distribution, technical support, and after-sales service for SLiquid's full range of products and solutions — enabling customers across oil & gas, marine, data-center, semiconductor and industrial sectors to access cutting-edge thermal management and infrastructure solutions underpinned by SLiquid's technology and AT&S's logistics, supply-chain and service capabilities.

*"Partnering with SLiquid aligns perfectly with AME's mission to provide industry-leading, reliable, and sustainable solutions to our clients," said Steven Toy, Chairman, AME International. "Together, we will bring high-performance data-center infrastructure and liquid cooling technologies closer to clients in the region."*

### About AT&S Pte. Ltd.

AT&S Group is a leading integrated engineering and industrial solutions provider, powering critical industries across Asia with unmatched supply chain strength and technical expertise. Headquartered in Singapore and established in 2009, the company serves the oil & gas, marine, offshore, energy, semiconductor, and data centre sectors. As part of AME Group, AT&S brings together four specialist subsidiaries—Aqua-Terra Solutions, Oceanic Offshore Engineering, KS Flow Control, and Raymonds Supply—creating a unified ecosystem that delivers end-to-end procurement, distribution, warehousing, and engineering support.

### About AME International Pte. Ltd.

AME redefines engineering excellence with precision-driven turnkey advanced manufacturing and supply chain solutions across diverse industry sectors that include, but not limited to oil & gas, semiconductor, marine/offshore, data centre and aerospace.

Our strength lies in our comprehensive capabilities:

- **Turnkey manufacturing** for oilfield equipment and precision-machined components
- **Large-scale welding and offshore fabrication** for marine and subsea projects
- **High-purity valves, regulators, and instrumentation** for semiconductor cleanrooms
- **Turnkey precision machining and EDM services** for aerospace and semiconductor clients
- **Critical infrastructure support** for the fast-evolving data centre sector

Backed by a fully integrated supply chain and over 150 advanced Computer Numerical Control (CNC) machines, automated Inconel cladding systems, heat treatment furnaces, and comprehensive Non-Destructive Testing (NDT) facilities, AME's end-to-end production capabilities ensure strict quality control, operational efficiency, and rapid project execution. With a bold vision for growth, AME is poised to lead the future of precision engineering, advanced manufacturing and supply chain solutions—delivering unmatched quality, reliability, and sustainability.
